BlueCherry®
Shop Floor Control Essential
REAL-TIME VISIBILITY ON FACTORY FLOOR OPERATIONS
Now more than ever, opportunities are swiftly won or lost based on a supply chain’s ability to deliver the right product at the right time and place with the right quality, price, and transparency. To succeed, today’s fashion, consumer goods and retail businesses must replace instinct with actionable data insights made possible by digitally transforming processes and automating information flow.

Unfortunately, many sourcing teams lack insight into basic factory metrics like capacity, productivity, downtime, and defect rates. Manufacturers often maintain KPIs manually, with no simple and reliable way of sharing them. As a result, both parties fail to capitalize on the opportunities for improvement.

**ONE PLATFORM - REAL-TIME VISIBILITY FOR ALL**

BlueCherry SFC Essential is the one technology capable of delivering the real-time visibility and control needed by sourcing organizations, factory management and production teams. This easy-to-deploy and use cloud-based platform is the simplest path to making your supply chain more productive, agile and transparent. It is the perfect way to equip sourcing teams to achieve more with fewer resources.

**BRANDS AND RETAILERS**

**Gain Visibility and Transparency** • BlueCherry SFC Essential provides sourcing teams with the on-demand and always up-to-date information to track select production milestones and monitor order status, line and factory productivity, quality, and compliance metrics.

**Improve Productivity and Reduce Costs** • Increasing visibility also empowers brands to identify and support suppliers’ efforts to maximize output, reduce costs, improve quality, and minimize non-productive time. Both parties benefit from the seamless and fluid exchange of information.

**Improve Sourcing Operations** • With the knowledge and oversight of factory operations; sourcing teams make faster, better-informed buys, inventory allocation, and operational decisions. Relationships are improved when buyers work with suppliers that have strong digital communications, the ability to collaborate on cost reduction initiatives and monitor ESG and regulations compliance.
MUTUAL BENEFITS

- Brands/Retailers
  - Increase Productivity & Efficiency
  - Track & improve on-time deliveries
  - Reduce production costs
  - Enhance quality performance
  - Eliminate waiting for status updates
- Improve Visibility and Transparency
  - Monitor factory & line performance
  - Track key production milestones
  - Access order status on-demand
  - Real-time work-in-process visibility
- Streamline Sourcing Operations
  - Faster, better-informed decisions
  - Identify and react to potential delays
- Understand cost saving opportunities
  - Monitor ESG and labor compliance

- Manufacturers
  - Improve Productivity & Agility
    - Reduce time & cost to produce
    - Improve product quality
    - Achieve on-time performance
    - Reduce non-productive time (off standard)
  - Inform Production Decisions
    - Faster, better-informed decisions
    - On-demand, real-time visibility
    - Automate tracking & reporting
    - Resolve quality issues quickly
  - Elevate Service Experience
    - Provide transparency & visibility
    - Automate information sharing

    - Improve customer relationships

- Production Teams
  - Monitor performance in real-time
  - Provide motivation & incentives
  - Increase individual or group efficiency
  - Achieve production milestones & goals
  - Foster collaboration, communications and teamwork

MANUFACTURERS

- Increase Productivity and Agility
  - Factories with BlueCherry SFC Essential have automated, real-time visibility to KPI performance, equipping them to reduce lead times, and costs, to improve production output and overall product quality. It also serves to minimize non-productive time and improve on-time deliveries.

- Improve Production Decisions
  - Better informed managers and production associates are equipped to make more timely and effective business decisions. Automated order and WIP tracking eliminate manual status counts and updates. Bottlenecks and defects are also identified and resolved faster.

- Improve Customer Service Levels
  - Suppliers with high levels of digital collaboration and transparency are more valuable and trusted partners of their customers. BlueCherry SFC Essential streamlines information sharing and collaboration, improving productivity, quality, compliance, and sourcing relationships.

PRODUCTION TEAMS

- Savvy executives and managers know that people are the foundation for sustainable production and enhanced performance. BlueCherry SFC Essential is an intuitive and easy to use tool with robust workforce development and motivation capabilities. Production workers use smart devices and tablets to improve their individual performance, reach production goals, stay informed and develop a greater sense of achievement.

- Advanced Technology
  - Fast, Simple Deployment
  - BlueCherry SFC Essential eliminates the traditional barriers to automating and sharing information across supply chains. The web-based platform is simple and fast to deploy as well as easy to use that it delivers a tangible ROI in a matter of months. Specialized technical expertise is not required, ongoing support requirements are minimal, and success is within reach!

OTHER BLUECHERRY SFC ESSENTIAL TECHNICAL ADVANTAGES INCLUDE:

- Off-the-shelf Android® tablets
- Multi-language capabilities
- Multi-factory w/consolidated reporting
- Built-in analytics, exception reporting Cloud hosting or on-premises
- Offline use capabilities
- Powerful API integration tools (ERP, other)
- Big screen, QC, machine maintenance options
